

Questions to discuss with your doctor

About Cholesterol

What are my current cholesterol levels?

- LDL-Cholesterol (low density lipoprotein) – often called ‘bad’ cholesterol
- HDL-Cholesterol (high density lipoprotein) – often called ‘good’ cholesterol
- TC (total cholesterol) – measures total cholesterol in your blood

What is my target cholesterol level?

What side effects should I be aware of on my current therapy?

About CRESTOR

What is CRESTOR?

What are the benefits of CRESTOR?

Is CRESTOR an appropriate treatment for me?

What is the CRESTOR Challenge?

Am I eligible to take part in the two week trial?

What are the possible side effects of CRESTOR?

How much does CRESTOR cost?

CRESTOR Abridged Information for Consumers CRESTOR is a prescription medicine that contains rosuvastatin in 5mg, 10mg, 20mg and 40mg tablets. CRESTOR lowers “bad” LDL cholesterol and raises “good” HDL cholesterol. CRESTOR has risks and benefits. Use strictly as directed. Consult your doctor to see if CRESTOR is right for you. CRESTOR is an unfunded medicine. Your doctor’s fee and a prescription charge will also apply. If you experience side effects, see your doctor, pharmacist or health professional. For more information please refer to the manufacturer’s Consumer Medicine Information available at www.medsafe.govt.nz/consumers/cmi/c/crestor.pdf 22 September 2014.
